AASHTO TAM Guide Book Club

Welcome

- Welcome to the fifth installment of the book club
- The TAM Guide Book Club will be meeting again in next week on **Wednesday 6/2**
 - Topic: Increasing your workforce capacity
- Visit the AASHTO TAM Portal to register and for the complete archive of past webinars

<https://www.tam-portal.com/event-directory/tam-webinars/>

Welcome to the AASHTO Transportation Asset Management Guide. Whether you are new to asset management, a seasoned practitioner, or an executive, this Guide will help to further your understanding of asset management techniques and advance asset management practices at your agency.

What is Transportation Asset Management?

As defined by the American Association of State Highway Transportation Officials (AASHTO), transportation asset management (or TAM) is a "strategic and systematic process of operating, maintaining, upgrading, and expanding physical assets effectively throughout their life cycle. It focuses on business and engineering practices for resource allocation and utilization, with the objective of better decision making based upon quality information and well defined objectives."

AASHTO TAM Guide Book Club

Welcome

FHWA is pleased to sponsor this special TAM Guide Book Club Webinar series

- Sharing knowledge is a critical component of advancing asset management practice
- The AASHTO TAM Guide is a valuable resource for agencies starting to develop their next TAMP
- This series is designed to focus on the areas where agencies will derive the greatest benefit:
 - Eight sessions addressing TAMP Implementation, Life Cycle Planning and Management, Financial Planning, and more

AASHTO TAM Guide

Book Club Webinar Miniseries

The new AASHTO Transportation Asset Management (TAM) Guide is now available! It is designed to help transportation agencies advance TAM practices and support them as they conduct TAM activities. The Guide will be especially helpful now as agencies prepare 2022 transportation asset management plans (TAMP). This interactive webinar miniseries will help participants familiarize themselves with what is in the Guide and how to use it to meet their TAM needs.

Visit the AASHTO TAM Portal for more information: <https://www.tam-portal.com/tam-webinars/>

Upcoming Webinars

21
April

2PM EDT

Preparing for your 2022 TAMP with the TAM Guide

This will be the introductory session to the TAM Guide book club miniseries. Presentations will address how agencies can use the Guide to help them with the development of their 2022 TAMP. The webinar will also introduce the format and contents of this webinar series.

Register <https://us02web.zoom.us/j/zoom/register/2?u=3p2nH1tq0k8dDx1n1LVE5DyR2Jp4>

28
April

2PM EDT

TAMP implementation and integration

TAMP implementation and integration showed the lowest performance in FHWA's recent assessment of the 2019 TAMPs. This is an area where agencies need resources to help improve practice. The webinar will cover where the Guide can help in the "how to's" for implementation and with integration with other agency activities.

Register <https://us02web.zoom.us/j/zoom/register/2?u=3p2nH1tq0k8dDx1n1LVE5DyR2Jp4&60e92P2kVw8>

5
May

2PM EDT

Life Cycle Planning and Management

Life cycle planning and management is an underpinning of effective TAM. The TAM Guide provides practical guidance, examples of practice, and "how to's" to help agencies strengthen life cycle planning and management of assets.

Register <https://us02web.zoom.us/j/zoom/register/2?u=3p2nH1tq0k8dDx1n1LVE5DyR2Jp4&60e92P2kVw8&60e92P2kVw8>

13
May

2PM EDT

Improving TAM Financial Planning

As agencies advance their TAM practices, financial planning and its integration with other aspects of TAM practices is an important ingredient. This webinar will point to specific aspects of good financial planning practices and will also cover the need to integrate financial planning with life cycle planning and management and with risk management.

Register <https://us02web.zoom.us/j/zoom/register/2?u=3p2nH1tq0k8dDx1n1LVE5DyR2Jp4&60e92P2kVw8&60e92P2kVw8>

27
May

2PM EDT

Improving Risk Management and Resiliency

Agencies are getting better at managing risks and building greater resiliency into their TAM programs. There is more to be done and the TAM Guide provides techniques for increasing risk and resiliency management capabilities. This webinar will share this guidance to help the participants find specific resources.

Register <https://us02web.zoom.us/j/zoom/register/2?u=3p2nH1tq0k8dDx1n1LVE5DyR2Jp4&60e92P2kVw8&60e92P2kVw8>

2
June

2PM EDT

Increasing Your Workforce Capacity

People are a key ingredient to TAM program success. TAM understanding and knowledge increases workforce capabilities to deliver better outcomes for the resources available. This webinar will share how the Guide can be used to strengthen workforce capacity to support the TAM program.

Register <https://us02web.zoom.us/j/zoom/register/2?u=3p2nH1tq0k8dDx1n1LVE5DyR2Jp4&60e92P2kVw8&60e92P2kVw8>

9
June

2PM EDT

Investment Strategies & Multi-Objective Decision Analysis

The ability to develop impactful investment strategies and to apply tradeoff techniques to select the best choices to meet those strategies is a key ingredient of advanced TAM programs. This webinar will use the TAM Guide to illustrate how to develop and implement effective investment strategies.

Register <https://us02web.zoom.us/j/zoom/register/2?u=3p2nH1tq0k8dDx1n1LVE5DyR2Jp4&60e92P2kVw8&60e92P2kVw8>

16
June

2PM EDT

Strengthening How Data Supports Your TAM Program

Data is a foundational resource for TAM. This webinar will walk through key objectives of how to manage your data to support your TAM programs and use the Guide to go over specific techniques. It will illustrate a specific case of planning for data needs associated with adding a new asset to your TAM.

Register <https://us02web.zoom.us/j/zoom/register/2?u=3p2nH1tq0k8dDx1n1LVE5DyR2Jp4&60e92P2kVw8&60e92P2kVw8>

Agenda

- | | |
|----------------|---|
| 2:00 PM | Introduction
Matt Hardy, AASHTO and Steve Gaj, FHWA |
| 2:05 PM | Agenda & Topic Introduction
Brad Allen, Applied Pavement Technology, Inc. |
| 2:15 PM | Use Case Scenarios
Todd Lamphere, Washington State DOT
William Johnson, Colorado DOT |
| 2:30 PM | Guidance Quests – Breakout Sessions |
| 3:10 PM | Breakout Session Feedback |
| 3:20 PM | Open Discussion and Q&A |

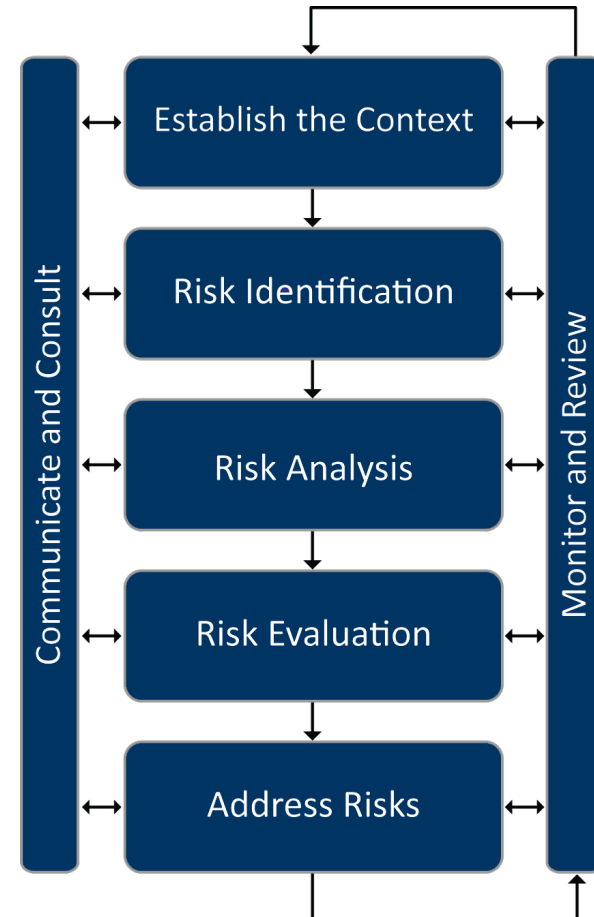

Risk Management

- **Risk:** The positive or negative effects of uncertainty or variability upon agency objectives. (23 CFR 515.5)
- **Risk Management:** The processes and framework for managing potential risks, including identifying, analyzing, evaluating, and addressing the risks to assets and system performance. (23 CFR 515.5)

Risk Management Process

- Context
 - What risks will be considered
 - How will risks be rated
- Identification
 - Be inclusive
 - Think Broadly
- Analysis
 - Cause(s), Consequence(s), Likelihood
- Evaluation
 - Prioritization
- Address Risks
 - Implement Mitigations

Analysis and Evaluation

- Likelihood
- Consequence(s)
 - Types of Consequences
 - Threats & Opportunities

Likelihood	1	Very High (>1x/Year)	Medium	Medium	High	Very High	Ultra High
	2	High (~1x/Year)	Medium	Medium	Medium	High	Very High
	3	Medium (1x/3 Years)	Low	Medium	Medium	High	High
	4	Low (1x/10 Years)	Very Low	Low	Medium	Medium	High
	5	Very Low (<1x/10 Years)	Very Low	Very Low	Low	Medium	Medium
			Very Low (Insignificant)	Low (Minor)	Medium (Moderate)	High (Major)	Very High (Catastrophic)
		Impact					
		1	2	3	4	5

Criticality

Criticality - A measure of the importance of an asset to the resilience of an overall system.

EXHIBIT 2.2
CRITICALITY
FACTOR
QUANTILES

Criteria	1 Very Low	2 Low	3 Moderate	4 High	5 Very High
AADT	≤ 720	721 - 1,900	1,901 - 4,600	4,601 - 15,000	≥ 15,000
AASHTO Functional Class	Minor Collectors	Major Collectors	Minor Arterial	Principal Arterial	Interstate Freeway Expressway
Freight (\$ Millions)	≤ 4,422	6,423 - 6,513	6,514 - 6,685	6,686 - 8,806	≥ 8,806
Tourism (\$ Millions)	≤ 152	153 - 479	480 - 1,050	1,051 - 3,414	≥ 3,414
SoVI®	≤ (-2.93)	(-2.92) - (-1.24)	(-1.23) - 0.67	0.68 - 2.51	≥ 2.52
Redundancy	≥ 4.5	3.01 - 4.5	2.01 - 3	1.51 - 2.0	≤ 1.0

SoVI is a measure that helps emergency response planners and public health officials identify, map, and plan support for communities that will most likely need support before, during, and after a public health emergency.

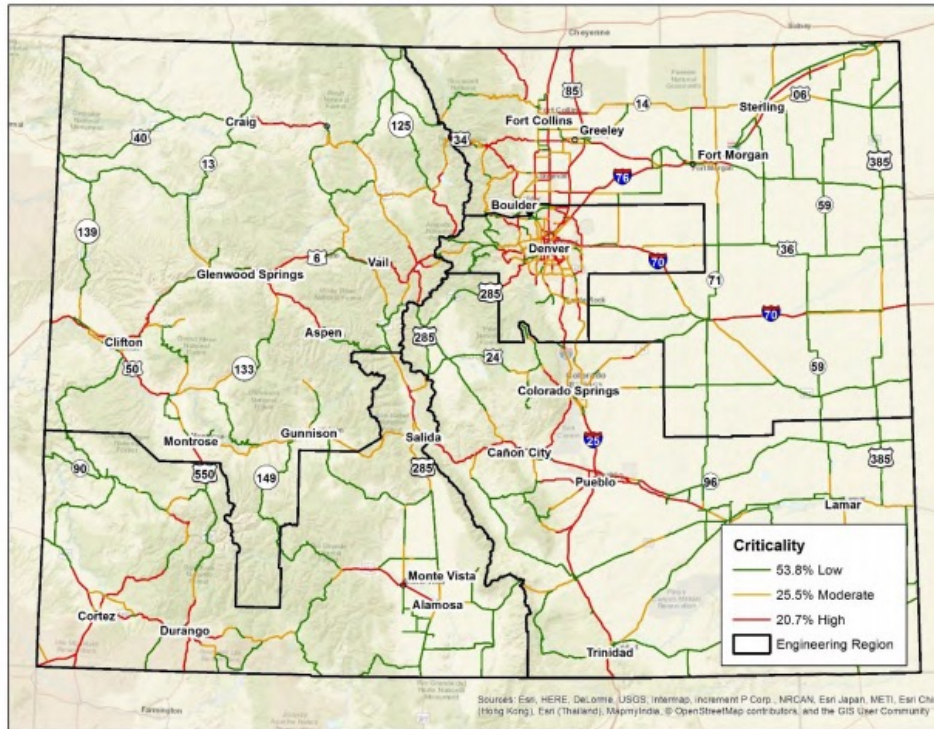

EXHIBIT 2.3
CRITICALITY
LEVEL
ASSESSMENT

Criticality Level	Score Range
Low	6 to 20
Moderate	21 to 22
High	23 to 30

CDOT Highway Criticality Map

EXHIBIT 2.4 CRITICALITY MAP FOR CDOT SYSTEM OPERATIONS

Sources: Spatial data for highways were downloaded for CDOT's Online Transportation Information System (OTIS).

Criticality Factors

- 1) AADT
- 2) AASHTO Functional Class
- 3) Freight Revenue
- 4) Tourist Revenue
- 5) SoVI Index
- 6) Redundancy

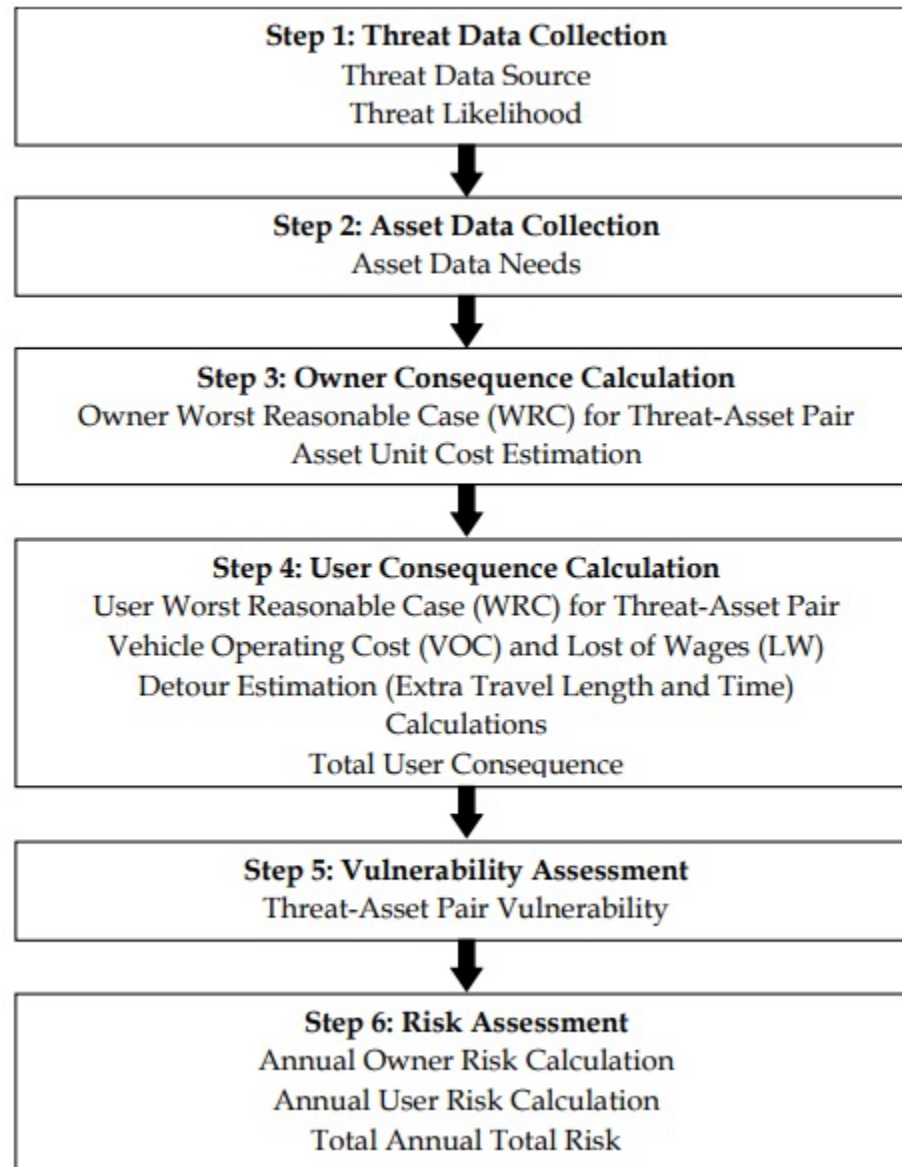

Criticality Level Example Problem

In this example, data has been collected for a fictional asset to demonstrate how to estimate an asset's Criticality. The example asset has the following characteristics:

- AADT - 2,050 vehicles per day
- AASHTO Functional Class - *Major Collector*
- Annual Freight Revenue Within County - \$7,000,000
- Annual Tourism Dollars Generated Within County - \$350,000,000
- SoVI® Score - 0.7
- Redundancy Score - 2.2

EXHIBIT 3.1
RISK
CALCULATION
METHODOLOGY

Step 1: Threat Data Collection

Threat Data Source

Threat Likelihood

EXHIBIT 3.2
THREAT DATA
SOURCES

Threat	Layer	Source
Flood/Scour	Floodplain	FEMA
Rockfall	Runout Zone	Software***
Post-fire Debris Flow*	Runout Zone	CGS, CWCB, Software***
Post-fire Debris Flow**	Volume/Volume Probability	USGS (BAER)
Post-fire Debris Flow**	Burn Scar	USGS (BAER)

*Colorado Water Conservation Board (CWCB) data only available for Boulder County as of June 2019. The Colorado Geological Survey (CGS) provides debris flow maps for El Paso, Jefferson and Larimer Counties. Flow-R or other software can be used to generate debris flow runout zones for other areas.

**USGS Burned Area Emergency Response (BAER) data is spatial data that includes projections of estimated debris flow likelihoods and debris flow volumes for a watershed that has recently burned.

***Examples of software modeling tools include Flow-R (<https://www.flow-r.org/>) and Rocky3D (http://www.ecorisq.org/images/ecorisq/services/Window_Rockyfor3D.jpg).

EXHIBIT 3.7
ROCKFALL EVENT
THREAT
LIKELIHOOD

Annual rockfall probability has been established by the CDOT Geohazard Program for specific magnitudes of rockfall for the I-70 corridor within Glenwood Canyon as shown in Exhibit 3.7. Note that this information is specific to I-70 and the user is encouraged to engage with the CDOT Geohazard Program Staff to determine the annual threat likelihood and relevant magnitudes for corridors other than I-70 in Glenwood Canyon.

Rockfall Event Magnitude	Volume (cu yds)	Annual Threat Likelihood
Small	≤ 100	1
Medium	100 - 499	1/6
Large	≥ 500	1/20

Step 2: Asset Data Collection

Asset Data Needs

EXHIBIT 4.1.1.4 DATA NEEDS FOR ROCKFALL-PTCS RISK ANALYSIS

	Data Needs	Data Source
Asset Replacement Cost	Milepost (beginning and end)	Highway Data-OTIS http://dtdapps.coloradodot.info/otis
	Site Length	500 ft (recommended length)
	Roadway Geometry	Highway Data-OTIS http://dtdapps.coloradodot.info/otis
Vulnerability	Rockfall Mitigation	CDOT Geotechnical
	Slope Type and Lithology	CDOT Geotechnical
	Roadway (rockfall) Ditch	CDOT Geotechnical
User Consequences	AADT Vehicles	Highway Data-OTIS http://dtdapps.coloradodot.info/otis
	AADT Trucks	Highway Data-OTIS http://dtdapps.coloradodot.info/otis
	Speed on Roadway Damaged	Highway Data-OTIS http://dtdapps.coloradodot.info/otis
	Speed on Detour	Highway Data-OTIS http://dtdapps.coloradodot.info/otis
	Detour Distance	CDOT Operations
	Detour Time	CDOT Operations
	Number of Closure Days	See Exhibit 4.1.1.9
	Number of Partial Closure Days	See Exhibit 4.1.1.9
	Average Vehicle Occupancy	FHWA https://www.fhwa.dot.gov/tpm/guidance/avo_factors.pdf
	Car Running Costs	(RITA)/Texas A&M Transportation Institute
	Truck Running Costs	American Transportation Research Institute
	Average Value of Time	(RITA)/Texas A&M Transportation Institute

Step 3: Owner Consequence Calculation

Owner Worst Reasonable Case (WRC) for Threat-Asset Pair

Asset Unit Cost Estimation

EXHIBIT 3.10
SUMMARY OF
WRC FOR
OWNER
CONSEQUENCE

		Threat			
		Debris Flow	Flood	Scour	Rockfall
Asset	Bridge Approach	N/A	100% ARC +\$5,000 Cleanup	N/A	N/A
	Bridge	N/A	100% ARC +\$5,000 Cleanup	100% ARC +\$5,000 Cleanup	100% ARC + \$200,000 if length < 100 ft, else \$2.5 million
	Culvert	100% ARC + \$5,000 Cleanup	100% ARC +\$5,000 Cleanup	N/A	N/A
	PTCS	N/A	N/A	N/A	25% ARC of 500 ft section + \$200,000 Cleanup
	Roadway	100% ARC + \$5,000 Cleanup	100% ARC +\$5,000 Cleanup	N/A	100% ARC of 100 ft section + \$200,000 Cleanup

*ARC = Asset Replacement Cost

EXHIBIT 4.1.1.6
UNIT COSTS

Asset	Units	Unit Cost
Bridge Approach**	sq ft	\$350
Bridge*	sq ft	\$600
Culvert***	cu ft	\$55
PTCS**	sq ft	\$550
Road Prism (Asphalt)**	sq yds	\$150
Road Prism (Concrete)**	sq yds	\$350

* Bridge area is defined as deck length multiplied by deck width, derived from NBI Items 49 and 52, respectively.

**Bridge approach, roadway and PTCS width are derived from CDOT OTIS Highways feature class using fields for lane width, lane count, and shoulder width.

***For culvert (CBC), the volume, in cubic feet, is calculated by multiplying the box height by the box width by the length. These values are derived from the culverts feature class maintained by C-PLAN, CDOT's interactive online mapping platform.

$$\text{Owner Consequence} = 25\% \times \text{ARC} + \$200,000$$

Step 4: User Consequence Calculation

Truck Running Cost per Mile	C3	\$0.96	2015
Average Value of Time per Adult per Hour	C4	\$10.62	2015
Average Value of Freight Driver Cost per Hour	C5	\$25.31	2015
Car Running Cost per Hour	C8	\$26.52	2015
Truck Running Cost per Hour	C9	\$44.24	2015

EXHIBIT 3.13
I-70 RISK AND
RESILIENCE PILOT
DETOUR TABLE

Starting Milepost	Ending Milepost	Additional Travel Distance (miles) (C7)	Additional Travel Time (minutes) (Dt)
1	14	146	189
14	90	90	112
90	155	140	167
155	205	98	126
205	231	83	109
231	245	49	77
245	288	3	7
288	353	15	24
353	360	71	96
360	404	76	73
404	438	69	70
438	450	63	77

User Consequence

Damage to the roadway may result in full or partial closures to through traffic and necessitate the use of a temporary work zone for construction and cleanup. Total User Consequences is the sum of user consequence due to full and partial closures as shown in Equation 3.2.

EQUATION 3.2

$$\text{Total User Consequence} = \text{User Consequence}_{fc} + \text{User Consequence}_{pc}$$

Where:

$\text{User Consequence}_{fc}$ = User consequences due to full closure
 $\text{User Consequence}_{pc}$ = User consequences due to partial closure

User consequences for full closure are the sum of vehicle operating costs incurred due to travel on detour, lost wages, and truck revenue due to travel on detour as shown in Equation 3.3.

EQUATION 3.3

$$\text{User Consequence}_{fc} = \text{VOC}_{fc} + \text{LW}_{fc}$$

Where:

VOC_{fc} = Vehicle operating costs incurred due to full closure
 LW_{fc} = Lost wages/truck revenue incurred due to full closure

User consequences for partial closures are the sum of vehicle operating costs incurred due to traffic delays, lost wages, and truck revenue due to delays incurred while driving through a partial closure as shown in Equation 3.4.

EQUATION 3.4

$$\text{User Consequence}_{pc} = \text{VOC}_{pc} + \text{LW}_{pc}$$

Where:

VOC_{pc} = Vehicle operating costs incurred due to partial closure
 LW_{pc} = Lost wages/truck revenue incurred due to partial closure

Step 5: Vulnerability Assessment

Threat-Asset Pair Vulnerability

Vulnerability is the measure of an asset's susceptibility to damage from a natural hazard. It is quantified as the probability of the Worst Reasonable Case occurring if an event is realized. Vulnerability is the expected probability of loss within a range between nearly zero and nearly one. Vulnerability represents a number of factors that literature and empirical data imply may influence an asset's susceptibility to incur damage from threats included in this procedure. While there may be other factors that influence vulnerability, the factors included in this procedure are available to CDOT staff in a range of databases and field observations and have been vetted by **Subject Matter Experts** who participated in this study.

EXHIBIT 4.1.1.10
ROCKFALL
VULNERABILITY
TABLE

Magnitude	Factors				Vulnerability			
Return Period (years)	Natural or Cut Slope	Lithology	Ditch	Monitored	No Mitigation	Slope Maintained	Installed Mitigation	
1-year (≤ 100 cu yds)	Cut Slope	Rock Slope	Absent	Yes	0.00	0.00	0.00	
			Present	Yes	0.00	0.00	0.00	
		Non-Rock Slope	Absent	Yes	0.00	0.00	0.00	
			Present	Yes	0.00	0.00	0.00	
	Natural	Rock Slope	Absent	Yes	0.01	0.00	0.00	
			Present	Yes	0.00	0.00	0.00	
		Non-Rock Slope	Absent	Yes	0.00	0.00	0.00	
			Present	Yes	0.00	0.00	0.00	
	6-year (101 - 499 cu yds)	Cut Slope	Rock Slope	Absent or Width ≤ 10 ft	Yes	0.35	0.30	0.15
					No	0.65	0.50	0.25
				Width > 10 ft	Yes	0.30	0.25	0.15
					No	0.60	0.45	0.25
Non-Rock Slope			Absent or Width ≤ 10 ft	Yes	0.30	0.25	0.15	
				No	0.55	0.45	0.25	
			Width > 10 ft	Yes	0.25	0.20	0.10	
				No	0.50	0.40	0.20	
Natural		Rock Slope		Yes	0.40	0.30	0.15	
				No	0.80	0.50	0.25	
		Non-Rock Slope		Yes	0.35	0.30	0.15	
				No	0.30	0.25	0.15	
20-year (≥ 500 cu yds)	NA			0.99				

Step 6: Risk Assessment

Annual Owner Risk Calculation

Annual User Risk Calculation

Total Annual Total Risk

EQUATION 3.9

$$\sum_{i=1}^n \text{Annual Owner Risk}_i = \text{Owner Consequence} \times \text{Vulnerability}_i \times \text{Threat Likelihood}_i$$

Where n = number of events

EQUATION 3.11

$$\sum_{i=1}^n \text{Annual User Risk}_i = \text{Consequence} \times \text{Vulnerability}_i \times \text{Threat Likelihood}_i$$

Where n = number of events

EQUATION 3.10 (Scour-Bridge)

$$\text{Annual Owner Risk} = \text{Owner Consequence} \times \text{PF} \times K$$

Where $K = K_1 \times K_2$

K_1 is a bridge type factor based on NBI data, and K_2 is a foundation type factor based on information.

In the case of scour-bridge analysis, the probability of failure (PF) is a combined threat and vulnerability probability.

EQUATION 3.12 (Scour-Bridge)

$$\text{Annual User Risk} = \text{Owner Consequence} \times \text{PF}$$

Total Annual Risk Calculation

EQUATION 3.13

$$\text{Total Annual Risk} = \sum_{i=1}^n \text{Annual Owner Risk}_i + \sum_{i=1}^n \text{Annual User Risk}_i$$

Where n = number of events

WSDOT Asset Management and Resiliency

Todd Lamphere, Statewide Transportation Asset Manager

May 27, 2021

WSDOT Asset Management: Applying the right treatment, at the right time, at the right location...Practical Solutions

Statewide Transportation Asset Management

Statewide Transportation Asset Management Plan (STAMP)

Ferries

- Terminals
- Vessels

Highways

- ADA
- Barriers
- Bridge
- Delineation
- Geotechnical
- Hydraulic
- Major Electrical
- Managed Natural Areas and Habitat
- Pavement
- Roadway
- Signs
- Toll-Related

Intra-Agency

- Facilities
- Information Technology
- Real Estate Services
- Transportation Equipment Fund (TEF)

Multimodal

- Aviation
- Public Transportation
- Rail

Statewide Transportation Asset Management

State of Transportation

Preservation (Millions of dollars)	Replacement Value	Average Annual Need	Current plan annual average spending	Average annual funding shortfall
Highways	\$123,425	\$730	\$350	\$380
Multimodal (i.e. Aviation, Public Transportation, Rail)	\$710	\$105	\$15	\$90
Intra-Agency (i.e. IT, Facilities, Fleet, Real Estate)	\$67,085	\$135	\$40	\$95
Ferries	\$5,145	\$460	\$160	\$300
TOTAL	\$196,365	\$1,430	\$565	\$865

Note: Rounded to the nearest \$5M

61% unfunded

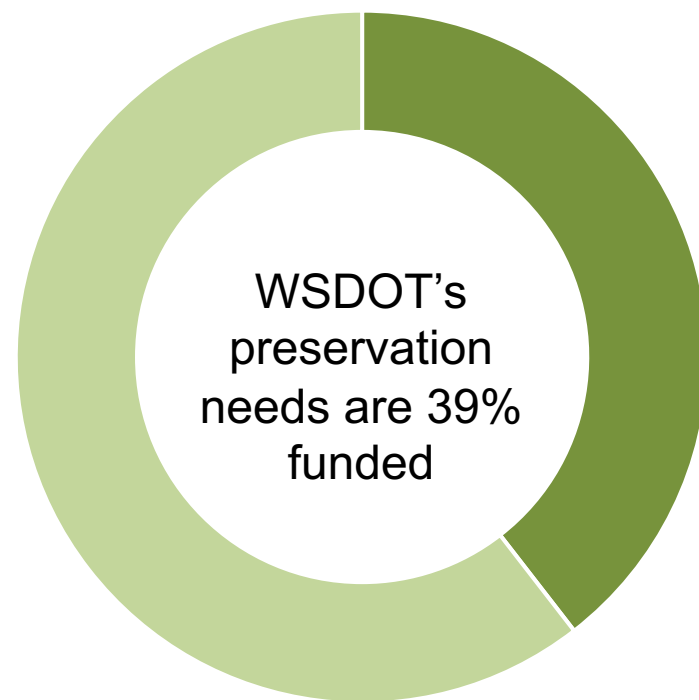

Statewide Transportation Asset Management

State of Transportation

(Millions of dollars)	Replacement Value	10-year Future Annual Avg. Spending	10-year Annual Additional Needs	10-year Budget, Plus Needs Annual Avg.	Percent funded
TOTAL	\$196,365	\$565	\$865	\$1,430	39%

- **Key takeaways:**
- WSDOT's preservation program is funded at 39 percent of its need
- How to deal with additional revenue
- What preservation activities will likely get funded
- This is why Asset Management Plans are key!

Statewide Transportation Asset Management

Statewide Asset Management Structure and Results

- Executive Steering Committee Structure
- Monthly Asset Management Technical Advisory Groups meetings
- State of Transportation replacement value for WSDOT's Transportation System in 2018 , 2019, 2020 & 2021
- State of Transportation unfunded needs
- Formal Risk Workshops for several asset classes
 - Self assessments for the remaining asset classes
- Asset Management plan updates should include their current practices that involve the respective Asset Class' resiliency efforts

Statewide Transportation Asset Management

WSDOT'S DEFINITION OF RESILIENCE

The term "resilience" means the ability to prepare for, and adapt to, changing conditions and withstand and recover rapidly from disruptions.

Adopted from:
Presidential Policy Directive 21, Critical Infrastructure Security and Resilience, February 12, 2013.

Statewide Transportation Asset Management

Federal Regulations related to Resilience and Asset Management

- Risk-based **asset management** plans must address risks associated with current and future environmental conditions (23 CFR 515)
- Assets requiring repeated repair require **analysis of alternatives** (23 CFR 667)
- State and metro **transportation planning** should now include resilience as a planning factor (23 USC 134, 23 CFR 450)
- **Metropolitan transportation plans** shall include an assessment of capital investment and other strategies to...reduce the vulnerability of the existing transportation infrastructure to natural disasters (23 CFR 450.324 (f)(7))

Statewide Transportation Asset Management

Resilience and Asset Management key thoughts...

- How do each of the programs prepare their respective Asset Management Plans with Resiliency in mind?
 - Include information that informs our partners during the planning phase. For example, modal long-range plans and Washington's Transportation Plan
 - Perform appropriate community engagement during these planning phases
- In our Asset Management Plans, how do we better communicate the need for WSDOT to prepare for, and adapt to, changing conditions and withstand and recover rapidly from disruptions?

Risk-Based Transportation Asset Management:

Building Resilience into Transportation Assets

REPORT 5: MANAGING EXTERNAL THREATS
THROUGH RISK-BASED ASSET MANAGEMENT

U.S. Department of Transportation
Federal Highway Administration

MARCH 2013

Asset Management Plan Updates

Asset Management Plan Technical Update Potential Focus Areas

- Updating information that may have changed
 - Have your objectives and/or measures changed?
 - Has your inventory changed?
 - Do you need to change any of your investment strategies?
- Adding a Resilience section to the Risk Chapter of the Asset Management Plans
 - Direction has been provided in the CPDM Asset Management Plan Updated Guidance
 - This will be an initial step to include resilience in the Asset Management Plans
 - This section will be further refined and improved in future updates
 - Resilience may be featured in future federal legislation
- Developing and/or Improving Processes for conducting Trade-Off Analysis

...WSDOT's goal is to start small and continuously improve.

Statewide Transportation Asset Management

Integrating Resilience

Goal: Integrate consideration of resilience in transportation decision making

- In support of 23 U.S.C. § 503(b)(3)(B)(viii), which directs the U.S. Department of Transportation “to carry out research and development activities ... to study vulnerabilities of the transportation system to ... extreme events and methods to reduce those vulnerabilities.”

Questions?

AASHTO TAM Guide Book Club

Quest

- **Quest** - Develop a risk register of 3 to 5 enterprise or program level asset management risks.
- **Instructions** - Use examples of risks from the TAM Guide or from your experience. Use resources from the guide to identify, analyze, and prioritize each risk. As time allows, identify potential mitigation strategies for each risk. Use the form to record your risk register and identify the sections or components of the TAM Guide that you used to develop your register. An example risk has been included to get you started.

AASHTO TAM Guide Book Club

Quest

To **select a breakout room** to join,
1. Click the ***Breakout Rooms*** menu
2. Click the ***Join*** link next to a room.

Your breakout room will be assigned
one of the three quests.

Quest Breakout Session

Feedback

- How did the guide help you develop your example risk register?
- What are your thoughts on how we can improve the value of the Guide based on the quest?
 - Updated resources?
 - Sharing new practices?
 - Linking to new guidance?
 - More resources to support the 2022 TAMP development?
